InfoStation

SignPro® InfoStation

Digital Signage is the most efficient and economical way to Inform and Update your customers in real time about your latest news and offers. Digital Signage is the superior way to achieve on line immediate broadcast of your messages. Forget old-fashioned paper posters being time consuming and expensive to create, having short actual information time/value. An optional Bluetooth proximity marketing there you can transmit information to customer's mobile phones. With optional embedded camera & audience measurement systems you can gather statistics from your audience to get a clearer view of who your actual customer is.

Custom Designs

The InfoStation is constructed from sturdy Carbon Steel or Stainless Steel depending on your requirements. The carbon steel version can be supplied with special Anti-Graffiti protection coat.

The colour can be customized to your specifications, there is ample space for company logos or advertising space on your InfoStation.

Your InfoStation blends in to your environment for aesthetic purposes instead of looking like it's something that just doesn't belong there.

Reach your Target Consumer

Optional Touch Screen enabling interactive or one-way communication of any digital content. Applications can vary from interactive information points such as in the city, tourist attractions, corporate premises, exhibitions, events & sports venues. The InfoStation can also be used in large scale Digital out of home network giving the ability to reach consumers at many different points during their day in different contexts and environments.

Full control from a centralized point

The InfoStation is a complete solution with SignPro Digital Signage software, allowing you to control the InfoStation(s) from a centralized point through a LAN or an Internet connection. You can advertise the launch of your new products, deliver information on sales promotions or simply display information to help your customers and people passing by. On-Line real time and - or scheduling of content to display.

A wide range of InfoStations for an even wider range of uses.

The infoStation comes with a single or two-sided 42" professional Display, up to 1080P HD and a contrast of 5. 000. 000:1. The InfoStation employs on-board an Advantech Industrial computer designed to work in the harshest environments.

Optional Camera

InfoStation comes with an assortment of optional accessories such as camera and software for audience measurement systems to further analyze who your prospective consumer is. Other accessories such as barcode scanners, Bluetooth proximity marketing module, Wi-Fi and more are available.

42" Professional Display

Colour Professional Display monitor specifically for heavy duty applications. With a viewing size as large as 42", it presents an ample display area as well as vivid and sharp images. The infoStation comes with an option of 2 x 42" Dual-Side professional Display's.
